

SPIDER-X5

HIGH-TECH AND DURABLE

Whether it's for outdoor or professional use, the SPIDER-X5 will meet your needs exactly. Waterproof and dust-proof (IP68), it is equipped with a 2MP camera with flash and is the perfect companion in any situation. Thanks to its tethering function, you can connect your laptop or tablet to the internet anywhere outdoors. Equipped with high-performance built-in antenna, it is even capable of receiving FM radio without needing to connect the headphones.

PRODUCT HIGHLIGHTS:

RESISTANT

Compact, light and tough, the SPIDER-X5 has what it takes to withstand the most extreme environments.

WATERPROOF IP68

The SPIDER-X5 is IP68-certified, meaning it is waterproof, dust-proof and can withstand temporary immersion for up to 60 mins at a depth of up to 2 meters.

2MP

Capture all your special moments thanks to its 2MP camera. Its LED flash and x8 optical zoom will enlarge your field of view.

TETHERING

The SPIDER-X5 allows you to connect your laptop or tablet to the internet anywhere outdoors.

NETWORK

Adapted to modern-day needs, the SPIDER-X5 will allow you to communicate with ease thanks to its powerful 3G+ network.

TORCH

You'll never be in the dark again with the SPIDER-X5's torch. It can be switched on at any time by pressing the torch button.

CROSSCALL.COM f t y o #ACTIONPHONE

SAR SPIDER-X5: Head : 1.13 W/kg / Body : 1.60 W/kg / Limbs : 3.63 W/kg // In accordance with article L11-3 of the Consumer Protection Act, all of the removal parts required for the use of this product will be available for 2 (two) years starting from the date it goes on sale to consumers. Telephone sold separately. The SAR (Specific Absorption Rate) quantifies the level of exposure to electromagnetic waves when used near the head or at a minimum distance of 5mm from the body. French law requires this level to be below 2.0 W/kg for head and body and below 4.0 watts/kg for limb on average for 10g of cellular tissue absorbing the majority of frequencies. The use of a hands-free accessory which serves to limit exposure of the head to the radioelectric emissions generated by mobile phones is recommended.
